Communication and Aging is a seminal account of how others perceive and interact with the aged. Coverage includes such topics as self-control, memory, resilience, age stereotypes, moral development, and the “art” of living. With contributions from top researchers in both gerontology and psychology, this book is an important reference for academics and professionals alike in personality, cognitive aging, moral development, and aging more broadly.

Communication, Health, and the Elderly is a book that considers communication and relationships through the lens of human development. Beginning with infancy and moving through adolescence to adulthood, the chapters examine communication and cognition in the various stages of human development.

Communication and Aging is a seminal account of how, when, and why we modify falling features of our communication - face-to-face and digitally - across a rich array of situations. It examines this, and critically so, through an impressive array of methods, languages and applied contexts, and it also discusses the social consequences of various accommodative/re-negotiable changes.

Patient-Provider Communications: Caring to Listen is a book that presents a comprehensive approach to patient-physician communication, centering on the importance of understanding the patient's perspective and the role of the physician in providing effective, empathetic care.

technological advances might improve quality of life for 21st century older adults and the providers who serve them. Utilizing interdisciplinary case studies to illustrate common problematic situations, this book provides detailed exercises that explain how providers can integrate person-centered communication into their practices to improve provider-older adult interactions. Written in a style designed to maximize learning, it helps providers find the information they need, understand what they read, and apply what they’ve learned to improve professional communication. Person-Centered Communication with Older Adults is an essential guide for today’s healthcare professionals and other aging-service providers, and also for the educators who help to prepare the providers of tomorrow. Presents a conceptual framework for understanding respect-based, person-centered communication Teaches specific communication skills to aging-service providers and educators to assist in effectively communicating with older adults Includes numerous case studies to help in identifying common problematic situations and describing practical ways to integrate positive communication One of the first books to integrate scientific, evidence-based findings with a personal approach that includes important new information on neurocardiology.
